

KELLEN

# DOUBLE EXCEL - FLAG

100% Natural Stone Top Layer

Custom-made Double Excel slabs provide a practical, aesthetic and appealing choice for large spaces.

Produced using specialist techniques, these slabs offer collection wells with hidden and open drainage channels. They are available in a broad selection of colours and shapes, with the added option of bespoke colouring.

Due to their size and weight, mechanical vacuum handling is necessary to lift and position Double Excel slabs. Hardscape can provide thorough laying guides for contractors on request.
