

CONCRETE

# CURLED CONCRETE

## Curled Concrete Flag Paving

Superior surface finish using premium granite aggregates which gives a modern alternative to porcelain and natural stone. Curling involves using a series of six rotating cylindrical brushes with bristles of differing materials and stiffness, rotating at various speeds, which sweep over the paver surface, gently polishing it and creating an intriguingly smooth and softened finish. Bespoke colours available upon request.

### Key Features

- Extremely robust due to the increased cement content and Granite surface
- Unlike Natural Granite and Porcelain, the Standard Granite Paving keeps the declared slip resistance of extremely low throughout its life cycle
- The curling process seals any porous element of a paving flag making the product easier to maintain

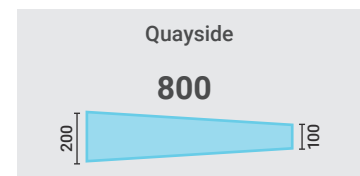

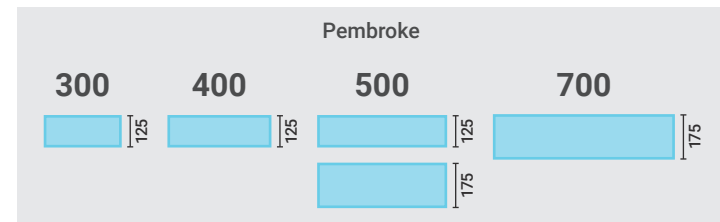

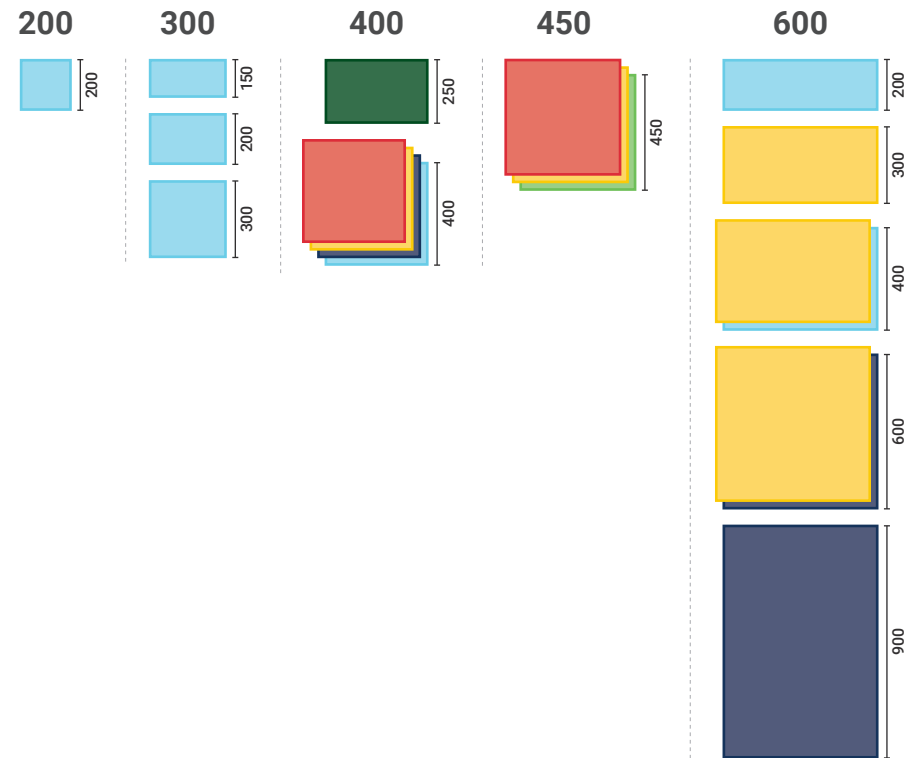

**CUSTOM SIZES AVAILABLE ON REQUEST**
