

SPECIAL SHAPES

Innovatively Designed Paving

The Kellen range is available in several special shapes, this exclusive architecturally refined concrete paver features a top layer of carefully selected stone aggregates.

The top layer is produced in four grain sizes of aggregate, making it extremely durable and less prone to general fading. Its natural, water-etched appearance means it is particularly suited to prestigious projects.

Key Features

- Natural stone surface
- Creates an original aesthetic
- Etched with high water pressure

All Special Shapes are available in Breccia and Lavano finishes except Hexagon which is only available in a Lavano finish.

- 80mm Thickness
- 100mm Thickness
- 120mm Thickness
