

CONCRETE

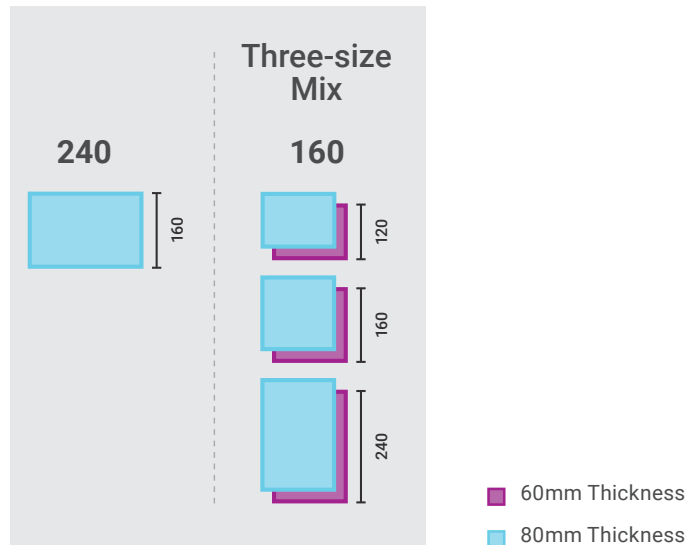

MELLIFONT CLIMAPAVE

ClimaPave is available in a range of concrete paving blocks.

ClimaPave offers an advantage over traditional techniques as the system is constructed using our specially engineered permeable paving block, which has enlarged joints on all sides, typically 4-8mm in width which allows water to rapidly drain from the surface.

Mellifont ClimaPave Features:

- Antiqued finish gives the look of time-worn cobble
- 3 Size mix
- Available in a range of colours
- Produced in through-mix

**CUSTOM SIZES AVAILABLE ON REQUEST****Head Office**
