

CONCRETE

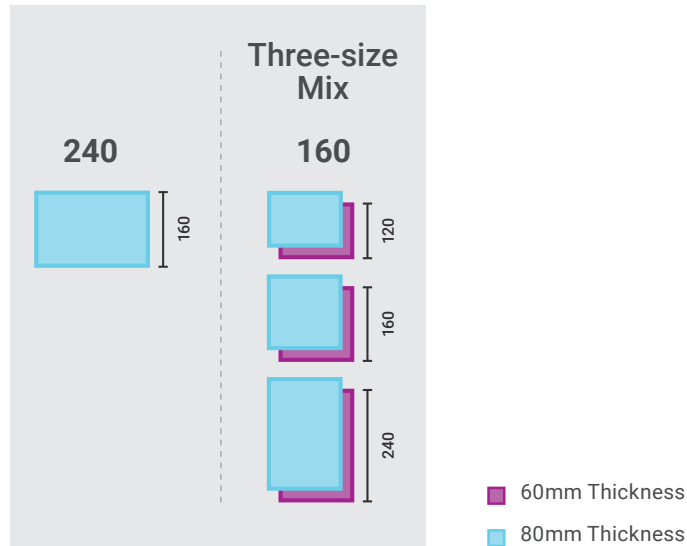

NEWGRANGE CLIMAPAVE

ClimaPave is available in a range of concrete paving blocks.

ClimaPave offers an advantage over traditional techniques as the system is constructed using our specially engineered permeable paving block, which has enlarged joints on all sides, typically 4-8mm in width which allows water to rapidly drain from the surface.

Newgrange ClimaPave Features:

- Lightly textured premium granite finish sett and cobble paving
- 3 size mix
- Part of the eco paving range

CUSTOM SIZES AVAILABLE ON REQUEST
