

MONTSENY is the oldest classic bench and seat assembly which, with no apparent change, has best been able to remain popular and fashionable since it was first created in 1990. The structural combination of the cast aluminium support with the inserted wood planks make this bench the most resistant of all those in its class.

FSC® Certified Wood | Aluminium  |  300 cm/màx. |  88 kg |  6

 Update 25.09.2025

ORIGIN

The Montseny bench was created and marketed by the company DAE, and is the most successful of the company's products since it was first set up. In 2013 it was added to the Escofet catalogue.

ROBUST

The insertion of the planks into the aluminium supports generates a robust, sturdy structure that ensures the dimensional stability of the wood in the event of potential deformations.

ERGONOMIC

The combination of the height and inclination of the seat, the height of the back and arm rests make the Montseny bench and seat extremely comfortable.

MATERIAL

The combination of a single support model and two plank sections made from FSC®-certified tropical wood permit the assembly of the seat, measuring 60 cm and benches with a length of 150 cm using two supports or a double bench of 300 cm with three supports.

INSTALLATION

Anchoring it with screws recessed in the paving and fastened with resin.

MONTSENY

1. Bench

Montseny	Chair	Bench 150	Bench 300
Dimensions	60 x 62 x 84 cm	150 x 62 x 84 cm	300 x 62 x 84 cm
