

SIT AIR in its bench and cube formats, with and without a back, is based on the idea of soft-textured site furnishings with rounded lines and visually attractive, that naturally blends into any environment. The collection has three combinable elements. A bench in two sizes to which a back can be added. The Air Collection version is highlighted for its lightness, the wide color palette and the possibility of incorporating a LED lighting kit into all three components.

Polyethylene HDPE |  240 cm |  45 kg |  4

Add-ons: LED

 Update 03.07.2025

ORIGIN

It is a revamp by the author of the Sit backless bench that was originally made from concrete.

ERGONOMI

Apart from its enormously attractive appearance which invites users to sit and rest, its most important feature is its ergonomic design that converts the elements into comfortable urban seats for public and private areas.

RECYCLED AND RECYCLABLE

It is monomaterial and 100% recyclable. The option in black color is 100% recycled, and consequently it is an environmentally sustainable product.

NON-POROUS

The peculiarity of non-porous HDPE material means that its surface is easy to wash with pressurised water and a degreasing detergent that contains surfactants. It is disinfected with a hydro-alcoholic solution.

MATERIAL

Made with rotomolded HDPE polyethylene, it's available in a wide variety of colors. This material offers great strength and durability, however, it is possible that they may suffer slight deformations over time in cases of prolonged exposure to the sun, high temperatures or intensive use. These variations do not compromise the functionality of the product.

The back module is fixed to a plate that is previously attached to the base with two M12 x 260 mm screws. All three components have a threaded inspection chamber cover permitting access to the interior.

INSTALLATION

Can be installed on the paving, and anchored, if required, using a hidden and removable system. Its rounded ends permit the installation of continuity modules, with no specific requirements in terms of precision.

1.2 Installation system

Hoisting

(W=15 kg / 45 kg / 9 kg)

Installation

1. Indoor: free-standing
2. Outdoor: Hidden and Removable anchored: Screw the M6 screws into the bushing supplied. Place the bushing+screw kit in the existing holes in the bench. Screw in 4 M5 side fasteners until the M6 screw is tight. Rotate the bench, mark the position. Drill holes in pavement (Ø20), fill with resin or fat mortar and place the bench. Optionally, to gain weight, the customer can ballast it with sand.

- ① plate with 2 welded nuts
- ② threaded inspection hatch Ø200
- ③ 2 outer rings
- ④ 2 threaded bars M12x260
- ⑤ threaded inspection hatch Ø145
- ⑥ 2 scooters
- ⑦ 16 6x20 Spax-s screws
- ⑧ screw M6
- ⑨ side fastener M5
- ⑩ threaded bushing pavement M6

Cubo Sit Air

Backless bench Sit Air

Short back Sit Air

Aggregation

* The Sit bank is delivered disassembled from the Sit backrest accessory, except in the case of RBN models with LEDs, which are delivered assembled.

Warranty

The warranty for this product is 3 years, in accordance with European Union legislation.

The names, trademarks and industrial models of the products have been logged in the corresponding registers. The technical information provided by Escofet about its products can be modified without prior notice.
